"Autopilot is a name that should be ubiquitous among the underground/indie scene." -Jamie Funk, No More Division

"[Autopilot] continue dishing out their full-bodied, atmospheric sound." -Kevin Bottaro, The Perfect Scene

Autopilot is an indie alternative rock band from Saskatoon, Saskatchewan. Their 2016 fall release, *Hurricane / Crooked Lines*, is the first two tracks from an upcoming full-length album to be released in 2017. These new songs highlight Autopilot's creative songwriting skills and include spacey tones and unique touches such as a bow used on the guitar, as well as dynamic drum beats and solid bass lines to keep the listener captivated.

Hurricane / Crooked Lines was recorded and produced by S.J. Kardash at Full Color Studios in Saskatoon and mastered by Sterling Sound in New York City. The band previously worked with Kardash on their 2015 release, *Desert Dreams*, and their last full length record, *Diamond Rough*, in 2013.

Autopilot has always been a dedicated touring band. They spent 5 months on the road in support of *Diamond Rough* including their first USA tour which was a huge success. They have kept the momentum going with *Desert Dreams* including three extensive USA tours and countless Canadian dates over the past 18 months. The band has plans to continue touring consistently across North America in 2016 and 2017 in support of the new single and upcoming full-length album.

Touring has taken the band all across the United States and coast to coast in Canada playing a variety of venues from small clubs to major festivals including Canadian Music Week, Indie Week, MoSoFest, Junofest, the Cathedral Village Arts Festival, AYE Fest, and Fairfield Revival. Autopilot has shared the stage with notable artists including Hollerado, You Say Party!, David Usher, Highkicks, The Albertans and The Tontons.
